

In this manual we describe how to install the Givt transmitters in a collection bag and what to look out for.

NECESSITIES

Provided by Givt:

- Pin

- Givt transmitters

Important!

The mounting of the transmitter can only be used once.

Did something go wrong during installation? Let us know, we will ensure that you receive a new mounting.

1 Push the pin through the fabric of the bag

Important: the pin is sharp. Place the pin about 3 centimeters below the metal ring in the fabric of the bag.

Push the pin through the fabric. This is easiest by pushing the fabric slightly above the edge. This gives you a sufficient grip to push the pin through the fabric.

Are you facing problems or do you have questions during the installation?

Contact us! We are happy to help you with all your questions.

2 Attach the pin to the transmitter

Important!

For an optimal result, the pin must be pushed perpendicular (90 degrees) into the hole. The hole is designed so the three corners bend with the pin, which makes it secure. Once fixed, you can no longer correct the pin.

Now press the pin into the hole. It takes force to place the pin properly. Do not use any tools for this.

If the pin is not properly placed, please contact us.

3 The transmitter is placed

**Your collection bag is now equipped with a Givt transmitter.
Have fun using Givt!**
