

Installing Givt transmitters to a collection medium

In this manual we describe how you can attach the Givt transmitters to a collection medium and what to look out for.

To make communication about the Givt transmitters easier, each Givt transmitter has its own identity number. This is a sticker with a number (ED02: xxxx) on it.

In order to ensure that the transmitters stick as long as possible in the collection medium, a good place must be chosen. For example inside the top cover or on the side of the medium. It is important that the transmitter is **not attached to the bottom**, because of the cash that falls on it.

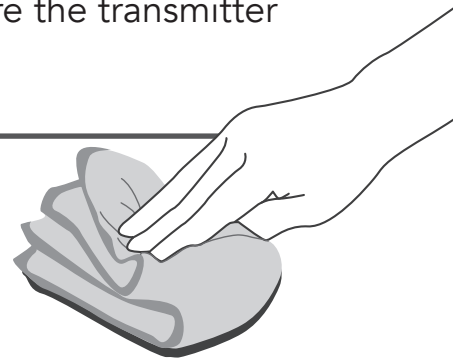

NECESSITIES

Provided by Givt:

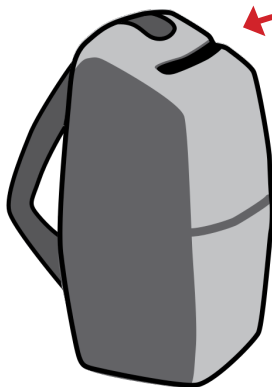

- Givt transmitter with adhesive attachment

- 1 Clean the area where the transmitter is to be placed

- 2 Remove the film layer from the transmitter

- 3 Attach the transmitter on the inside

Your collection device is now provided with a Givt transmitter. Have fun using Givt!
